EDUCATION

Swami Keshvanand Institute of Technology, Management & Gramothan Jaipur | Jul 2021 – Jun 2025
Bachelor of Technology – Computer Science Engineering

Relevant modules: Data Structures & Algorithms, Database Management Systems, Business Intelligence, Statistical Analysis, Python Programming & Software Engineering Principles

PROJECTS

Enterprise Connected Planning & FP&A Implementation – Anaplan | Global Publishing Client | GenXAI Analytics Jaipur | May 2025 – Jan 2026

- Designed and delivered an end-to-end Connected Planning solution in Anaplan spanning budgeting, forecasting, revenue planning, and P&L consolidation across 20+ business units and 35+ cost centres, standardizing enterprise-wide financial planning while improving governance and decision support.
- Engineered and optimized 50+ multidimensional line-item calculations—including driver-based allocations, moving averages, YoY variance logic, and time-based forecasting—while implementing Dynamic Cell Access (DCA), ALM revision management, reusable calculation frameworks, and PLANS modelling principles to improve model performance by ~20%, reduce planner data-entry errors by ~30%, and enhance long-term model maintainability.
- Led multiple UAT cycles, deployment validation, and production release activities throughout the complete Anaplan SDLC, ensuring successful go-live with minimal production defects while preparing technical documentation, KT sessions, and reusable model standards for future enhancements.

Enterprise Incentive Compensation Management – Anaplan & Kennect | Pharmaceutical Client | GenXAI Analytics Jaipur | Jan 2026 – Present

- Configured Kennect data pipelines transforming transactional sales data across 20+ territories into audit-ready incentive calculations, implementing JavaScript-based business rules, configurable workflows, and validation logic to improve processing reliability while eliminating manual payout errors.
- Expanded ownership into a parallel Anaplan planning workstream while resolving duplicate records, inconsistent hierarchy mappings, and validation failures before downstream processing, reducing reconciliation effort by ~35% and improving planning accuracy and audit readiness.

PROFESSIONAL EXPERIENCE

GenXAI Analytics Jaipur | Jan 2025 – Present
Associate Consultant

- Delivered end-to-end enterprise planning implementations across FP&A, S&OP, and Incentive Compensation Management by applying Anaplan SDLC best practices, participating in requirement discovery workshops, BRD analysis, solution design, sprint development, model building, UAT, deployment, production support, and continuous enhancement across enterprise planning applications.
- Automated product hierarchy maintenance, enhanced consensus-planning dashboards, and implemented scalable model enhancements within a live Anaplan S&OP application by applying DISCO architecture and PLANS modelling principles, reducing manual maintenance effort while improving model scalability, governance standards, solution maintainability, and long-term platform performance.
- Collaborated with Solution Architects and functional consultants on schema design, planning hierarchies, RACI ownership matrices, and implementation roadmaps while validating solution feasibility and co-authoring functional specification documents for enterprise FP&A solutions.
- Completed Anaplan Model Building Levels 1–3 and advanced Excel training, achieving Certified Model Builder status; recognized with the Rising Star (Q1 FY25–26) and Aspiring Achiever (Q2 FY25–26) awards for rapid platform mastery and consistent, high-quality delivery.

Celebal Technologies Jaipur | May 2024 – Jul 2024
Cloud Intern

- Supported deployment and governance of Azure cloud data infrastructure by working with data pipelines, storage systems, and platform configurations, gaining hands-on experience in managing structured data environments used for analytics, reporting, and enterprise data processing workflows.
- Implemented data security configurations and performed structured vulnerability assessments, ensuring data integrity, compliance, and secure access; contributed to improving reliability of data systems supporting analytics and reporting use cases across enterprise cloud environments.
- Developed technical documentation and configuration reports translating cloud and data infrastructure requirements into structured, audit-ready records, improving clarity in data workflows and strengthening cross-team communication for analytics, reporting, and governance processes.

TensaX Innovation Lab Jaipur | Jul 2023 – Sep 2023
Machine Learning Intern

- Addressed slow outreach workflows by building automated data pipelines using Elastic Search, Kibana, and Logstash, extracting 10K+ profiles including email IDs, names, and job roles, reducing processing time by 60% and enabling scalable, high-volume data handling for analytics use cases.
- Designed structured data workflows by merging disparate datasets into unified, analytics-ready formats, improving data consistency and reporting accuracy, and enabling reliable, data-driven insights for product and machine learning teams across multiple use cases and decision-making processes.
- Collaborated with engineers to develop a system generating personalized LinkedIn messages under 300 characters using GPT, increasing response rates by 25% and automating targeted outreach workflows at scale for improved engagement and efficient prospect communication.

SKILLS & ADDITIONAL PROJECTS

Technical Skills: Anaplan (Model Building L1–L3, UX, ALM, Anaplan Workflow), Kennect (ICM Platform), Advanced Excel, SQL, Power BI, Python, AI & Automation Tools: ChatGPT, Claude, Zapier, n8n.

Domain Expertise: FP&A, Budgeting & Forecasting, Variance & Scenario Analysis, Incentive Compensation Management, Solution Design, ETL Pipeline Design, Business Requirements Gathering, UAT, Production Support, Stakeholder Management & Dashboard Development.

Certifications & Achievements: Anaplan Certified Model Builder – Level 1, 2 and 3, Anaplan L2 Polaris, Anaplan ALM Implementation, Anaplan Workflow, The Anaplan Way, Advanced Excel, SQL (HackerRank Certified), Rising Star Award (Q1 FY25–26), Aspiring Achiever Award (Q2 FY25–26).

Projects: Enterprise FP&A Implementation (Anaplan – Publishing), Enterprise Incentive Compensation System (Anaplan & Kennect – Pharmaceutical), Sales & Operations Planning Enhancement (Anaplan – Consumer Goods) & Enterprise FP&A Solution Design (Anaplan).
